

"A Polish DIAS for Europe" conference

Ministry of Science and Higher Education of the Republic of Poland is organising the international conference on "A Polish DIAS for Europe" with participation of the representatives of the European Commission, European Space Agency and other European institution and space sector.

The main task of the conference is to emphasise the importance of Copernicus DIAS for Poland and all Europe. The conference is also an excellent opportunity to present the capabilities of Polish space sector to process and use the satellite data as well as to establish and foster contacts with the representatives from leading space institutions from Europe.

Organisation

The conference will be held on **2 July 2018 in Copernicus Research Centre in Warsaw**. Additionally we are organising the 3D show in Planetarium "Heavens of Copernicus" on Sunday, 1 July at 7.15 pm. The sightseeing of the exhibitions of Copernicus Research Centre is also possible on Sunday, since 5.00 to 7.00 pm .

The official language of this conference is English.
